

THERMOTWIST

DROP AND TWIST

INSERT SYSTEM with  
GRAB & GO  
THERMAL CONTAINER

1

Drop and Twist Insert System is a great all-in-one solution that goes in the freezer/fridge, microwave, dishwasher sanitize and grab and go thermal containers. Eat your foods cold, or microwave hot with the lid stopper on then just grab the cool touch rim to handle and enjoy your hot snacks and meals.

2

Your Storage container replacement, Drop and Twist inserts benefit by design, fitting in small spaces and takes up less room. Easy to hold and manage, designed vertically instead of flat, which accommodate your healthy made foods, snacks and leftovers for better convenient food management. Prep individual portion sized containers that you have healthfully made, sized right to look presentable, even more delicious when eaten. Prep individual portion sized containers that you have healthfully made, sized right to look presentable, even more delicious when eaten.

3

Saves time and money, preparing your foods in batches, and individually packed. Finally a design that supports making fresh and appetizing looking foods that are healthy, and delicious. Clear inserts let you portion control your meals, see what your eating, and the state of food, included lid stoppers seal airtight, keeping foods better preserved, and lasting longer.

## Geeks 'Reinvent' the Thermal Food Container, Designers Make it Personal and Trendy

*Thermotwist Inc. launches popular 2016 designs for its Drop and Twist, Insert System with Thermal Container.*

**Toronto, ON – March 16, 2016** – It's no surprise why [Drop and Twist Insert system with Thermal Containers](#) hit the ground running in January of 2016. This insert system is an amazing replacement for food containers and stores more food in small spaces. The inserts with included airtight lids, are BPA and phthalate-free, can be put in the freezer, fridge, microwave and dishwasher sanitize clean. Each insert has a cool-to-the-touch rim that lets you remove from the microwave with your fingers and 'drop and twist' into the fashionable thermal Container with a triple wall design, keeping foods hot and cold longer, a pop-up travel handle is also included. Individual filled inserts are so convenient for the family; snacks and meals are often eaten before they make it out the door.

"This insert system with Thermal Container is where innovation meets fashion," says Zisi Konstantinou, V.P. of Thermotwist Inc. "Not only does the product boast [health conscious](#), convenient, time and money saving features, also comes with [trending styles and patterns](#), [NHL](#) and [Mossy Oak](#) for [women](#), [men](#) and [kids](#). Now you can have your personal meals to go, in a fashionable and functional way.

Pioneering product developers behind Thermotwist Inc. created a patent pending insert system and thermal container that lets users choose from a wide variety of trendy designs, prepare healthy food in batches, store it in space-saving personal serving sized inserts, grab and go when they're on the move, and heat things up whenever they need to.

"We created this product out of a real necessity," explains Spyros Theoharis, Founder and Creator of the Drop and Twist Thermal Container. "With a family of six, although thermoses were helpful, they had their downfalls. Freezing premade food in the right sizes was tricky, I had to remember to pull it out the night before, it took time to transfer food from the container to the thermos, not to mention the fact that hand washing everything took forever. I needed a better way to manage meals and get everyone out the door faster."

Keep your eyes peeled for the Drop and Twist Thermal Container in your favorite retail stores across North America. Add this exciting new product to your food prep routine, buy online at [www.dropandtwist.com](http://www.dropandtwist.com), with a retail price of \$24.99 USD. And don't forget to stock up on additional inserts, available in packs of two (\$6.00) and four (\$10.00).

### **About Thermotwist Inc.**
